INTRODUCTION TO TRONHERO TOKEN (THERO)

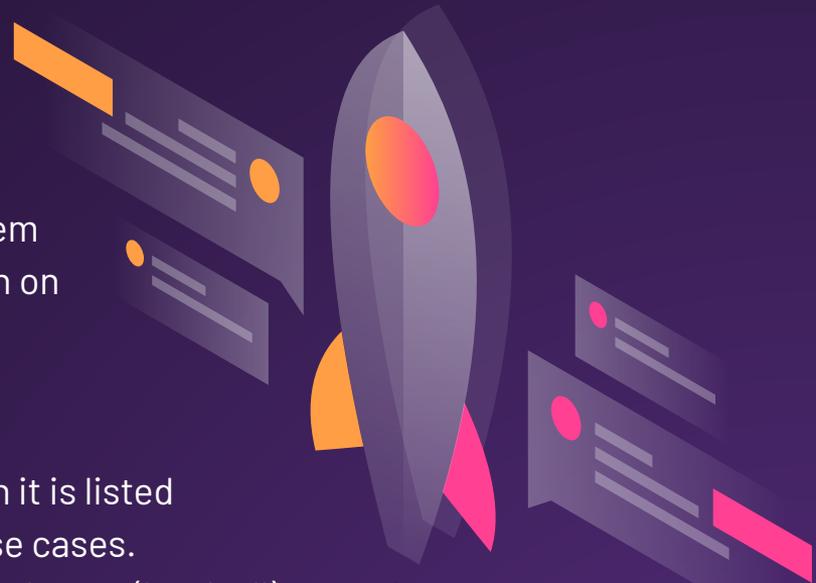

TronHero Token is the native token of the TRONHERO Ecosystem and is identified by the ticker THERO. THERO is a TRC-20 token on the Tron Blockchain Network. Its value is decided by the community and is represented initially by staking difficulty.

The value of THERO will be determined by the community when it is listed on exchanges, such as JustSwap / Poloniex, and through its use cases. Until exchange listing, THERO token will only be available for exchange (buy/sell) on HEROSwap (swap.tronhero.io), which is TRONHERO'S very own Swap portal.

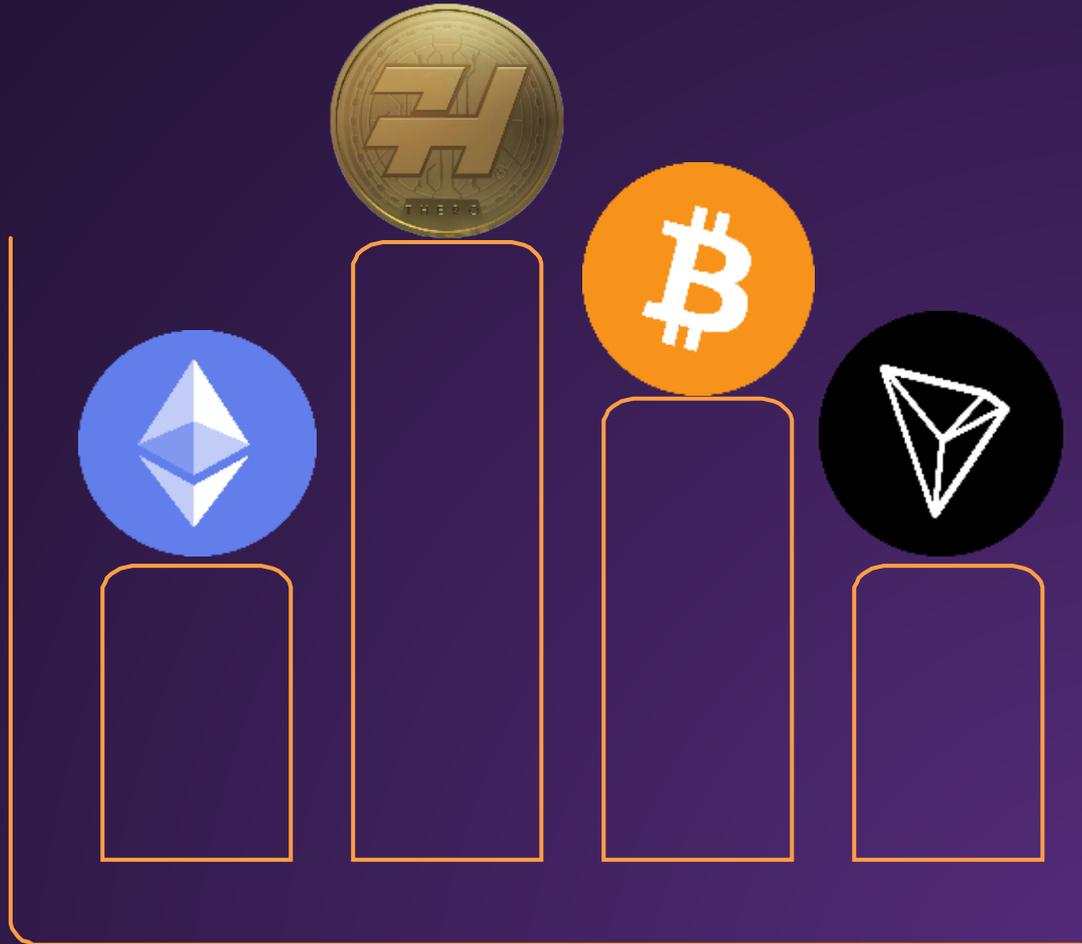

As a TRC-20 token, THERO has the ability to be used in TRONHERO'S future projects/platforms

The only official THERO Token address is: <https://tronscan.io/#/token20/TEEoAG6V1soUKsdjtbRvTB29q8dicfqf3M>

(Beware of fake tokens with fake addresses)

THERO STAKING / MINING

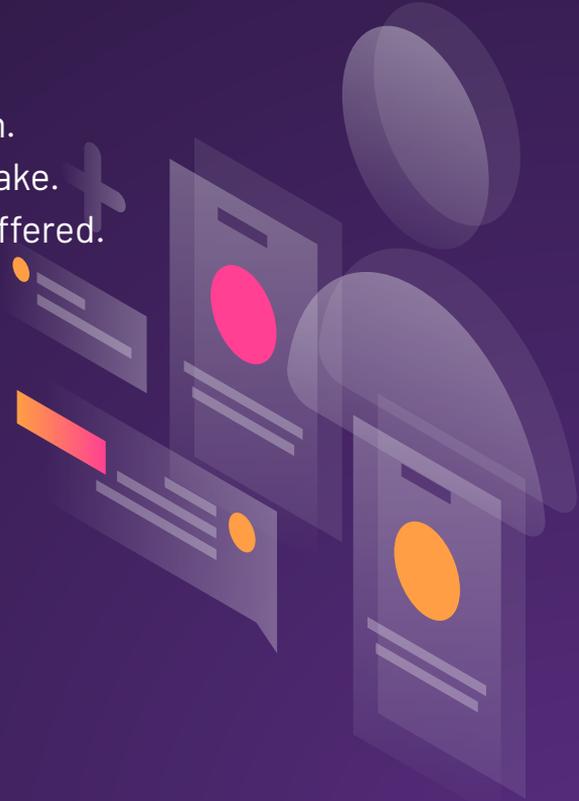

THERO

STAKING / MINING

A minimum of 200 TRX is required to begin staking / mining the THERO token. An upline address (referral link) is compulsory for a community member to stake. This allows 'uplines' to benefit from the attractive referral rewards package offered. The mining pool will yield THERO Tokens passively. This is termed as simple staking, as there are no Liquidity Pools that can attract permanent or impermanent loss . The staked TRX is SAFE in mining and THERO is being mined WITHOUT RISK and for FREE.

The daily yield depends on:

- 1) The total daily mining supply, and
- 2) The amount of TRX that the member has staked aka (Daily Share)

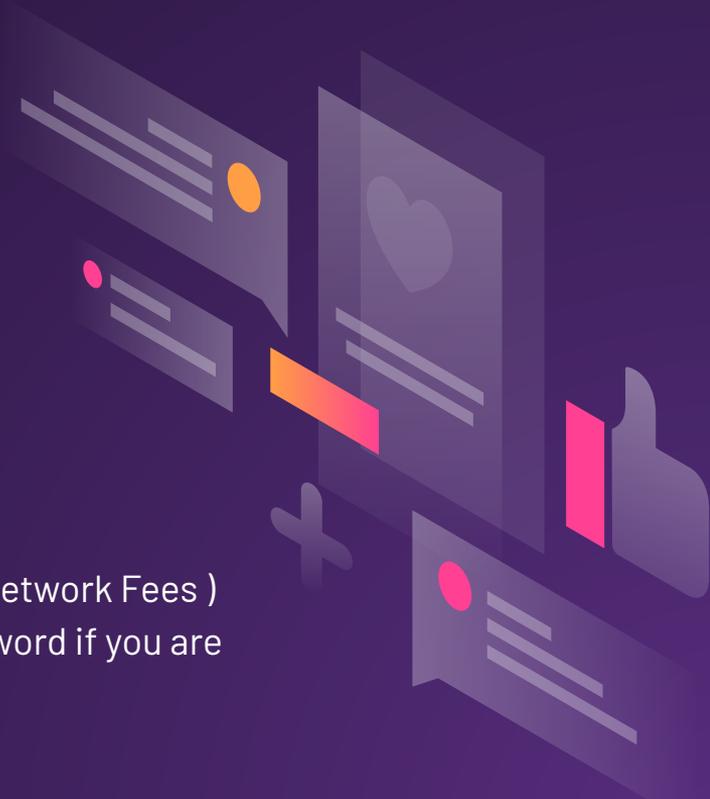

THERO

STAKING / MINING STEPS

Thero Stake Tutorial

- a). Open your Tronlink wallet or Other Tron Wallet and Click on DApp, Discover or Browser Icon
- b). Enter the Official website : <https://stake.tronhero.io>
You will now enter Hero's Headquarters
Your available TRX balance will be shown in first box
- c). Enter the amount you wish to stake
(min 200 Trx, there is no maximum)
- d). Click on Stake Now
(Make sure you have minimum 20 TRX in your wallet for Tron Network Fees)
- e). Sign the Transaction by Accepting it (Chrome) or enter your Password if you are on a mobile phone authorizing it.

You have successfully staked TRX and are now mining THERO

THERO

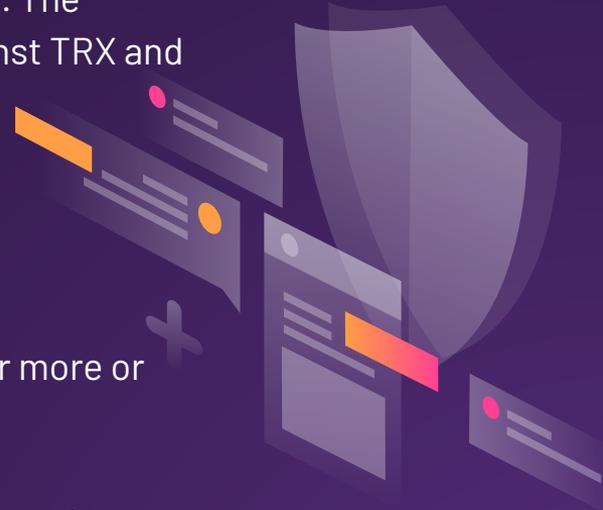

THE DAILY MINING SUPPLY

A variable daily mining supply will be allocated to the mining pool for the day. The Exchange/Swap platform will be called for the current price of THERO against TRX and that will determine the total minable tokens for the day. Therefore, the Mining Rate will be decided as THERO at the current price against TRX. This cannot be more than the maximum limit 3.472 THERO per Block, or less than minimum limit 0.03472 THERO per Block.

Before Exchange listing the token price is set at 1 TRX = 1 THERO. After the genesis period, the decrease or increase in the price will determine whether more or less THERO Tokens are available in the daily mining supply.

A minimum total of 1 000 000 TRX (one million) must be locked for mining to begin on the first day and on any day thereafter.

TRX may be added to the stake to increase the staked amounts at any time once the Genesis mining period (The first 10 days of mining) are over. Upon adding to the stake, the pending rewards will be automatically paid and the rewards will start again from 0 (Zero) for the current total staked TRX.

THERO

THE DAILY SHARE

The share of the daily supply of THERO is based on the amount of TRX that has been staked according to the following formula:

$$\text{Share of THERO per 1 TRX staked} = (\text{Daily Mining Supply} \div \text{Total TRX Staked})$$

EXAMPLE of how the daily mining supply operates:

For this example we illustrate with a constant daily total stake of 2 000 000 TRX.

If the opening price of THERO received from Exchanges is: 1 THERO = 1 TRX, this will calculate and determine the number of THERO mineable for the day. The Daily Mining Supply for this at the above price is 100000 TRX

Person 1 Stats:

Staked = 5000 TRX

Person 2 Stats:

Staked = 20000 TRX

Share Rate: **(Daily Mining Supply ÷ Total TRX Staked)** $100000 \div 2000000 = 0.05$ THERO Per TRX

Therefore 1 TRX will mine 0.05 THERO for the day

Person 1 (5000 TRX): Mining speed = 250 Tokens / day (Total Staked TRX * Shares Rate) i.e. (5000 x 0.05)

Person 2 (20000 TRX): Mining speed = 1000 Tokens / day (Total Staked TRX * Shares Rate) i.e. (20000 x 0.05)

One can also calculate one's mining profitability by using the Hero Calculator available on swap.tronhero.io

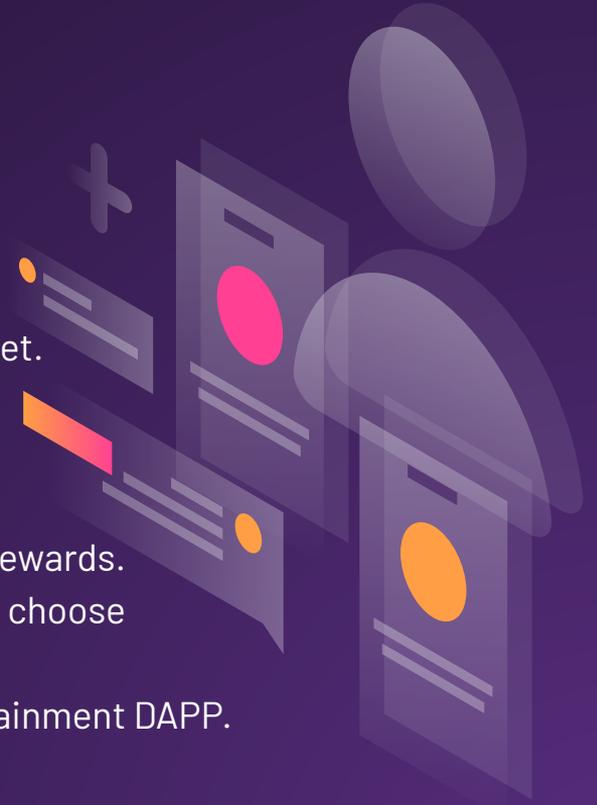

THERO CLAIM

Claiming THERO token is unrestricted (subject to Genesis mining). Upon claiming, THERO will reflect directly in the member's personal wallet.

Whenever a person claims, 95% of the THERO tokens (personal rewards + referral rewards) are sent directly to the personal wallet. The remaining 5% will be sent to the THERO SUPERFUND insurance contract to improve sustainability of the SUPERFUND.

Claim will calculate Personal Pending Rewards + Referral Bonus Pending Rewards. Once the THERO appears in the personal wallet, the wallet owner is free to choose what to do with the tokens. S/he may swap the token, hold the token, use the token in a THROHERO Crowdfunding DAPP or a TRONHERO Entertainment DAPP.

THERO UNSTAKE

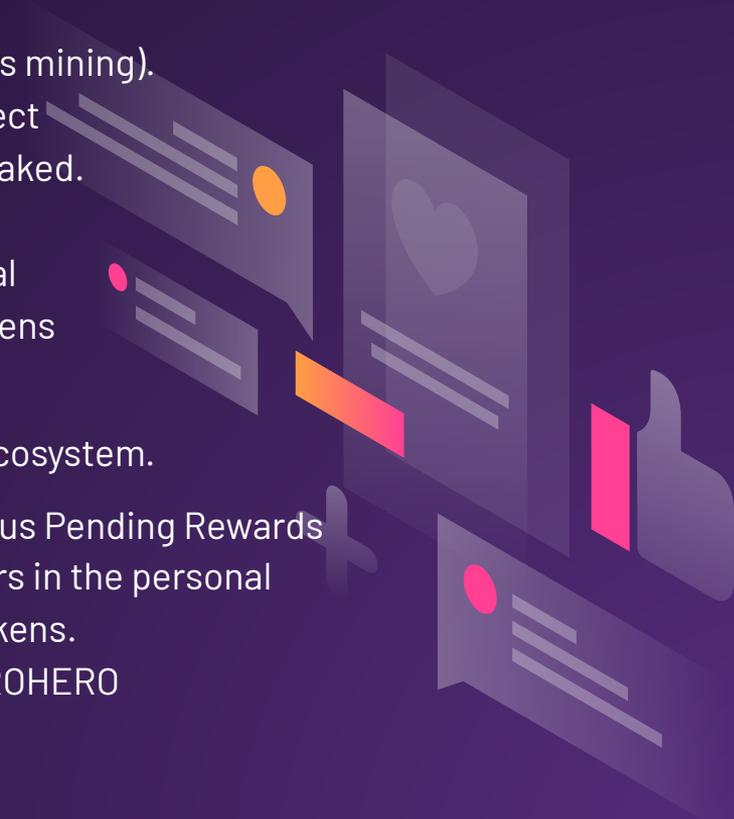

UNSTAKING (& CLAIM) THERO is unrestricted (subject to Genesis mining). Upon unstaking, THERO Rewards (Personal & Referral) will reflect directly in the personal wallet together with the TRX that was staked.

UNSTAKING attracts a fee of 10% of total staked TRX. 5% of total collected fees will be used to buyback THERO and BURN the tokens to reduce supply.

The remaining 5% will be used for further development of the Ecosystem.

Unstake will calculate Personal Pending Rewards + Referral Bonus Pending Rewards and the TRX that was staked (less fees). Once the THERO appears in the personal wallet, the wallet owner is free to choose what to do with the tokens.

S/he may swap the token, hold the token, use the token in a THROHERO Crowdfunding DAPP or a TRONHERO Entertainment DAPP.

THERO

DEFLATIONARY NATURE

BUYBACK & BURN

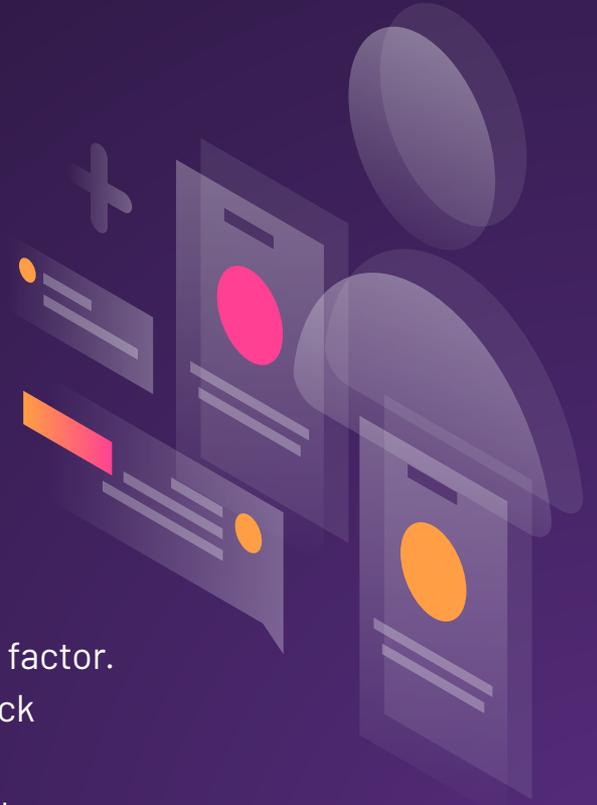

TronHero will buy THERO every week/month from the exchange in bulk (from 5% of TRX collected from unstaking).

The tokens that are bought will be burned. This is expected to increase the price of the token.

THERO is a deflationary token which hedges against inflation with its burn factor. This means that the burning of THERO on each transaction and the buy back (and burn) transactions will have the effect of reducing the token supply. This will inevitably increase the price of the token due to its gradual scarcity.

TOKEN BURN POOL

On every transfer of THERO 0.004% will be burned (this assists in reducing circulating supply) and 0.004% will be collected for further development of Projects.

THERO

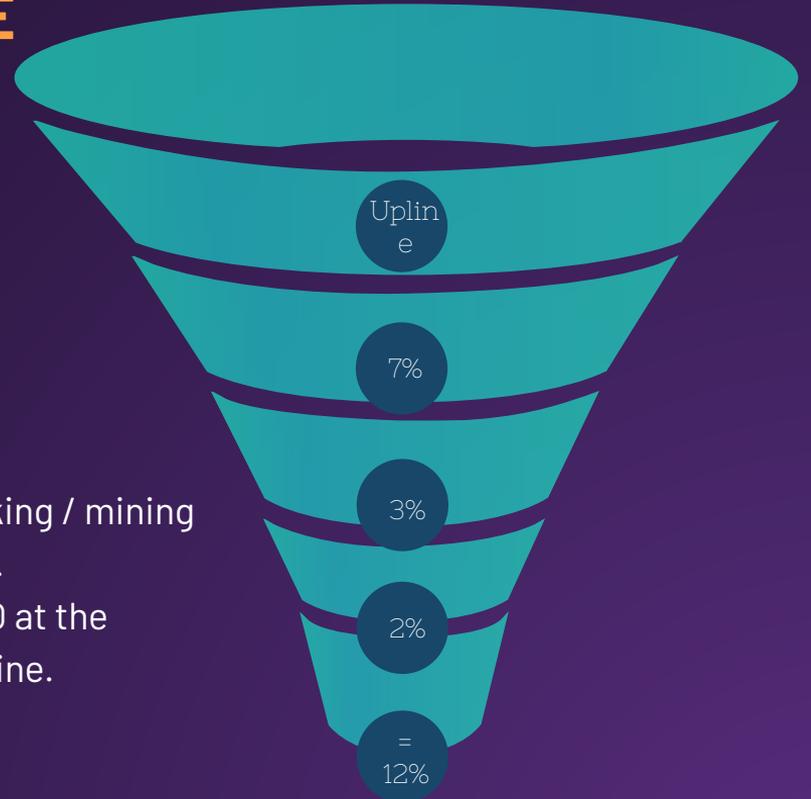

REFERRAL REWARDS PROGRAMME

Staking / Mining rewards will be paid for a member's direct referrals on 3 levels as follows:

- Level 1 - 7%
- Level 2 - 3%
- Level 3 - 2%

TRX is added to the upline's stake in a referral tranche of staking / mining and referral rewards are earned in THERO as downlines mine.

If a downline unstakes, then the upline ceases to earn THERO at the mining rate that the TRX was added for that particular downline.
